

SHARIF AZMAINE RATUL

Admin Executive | Administrative Operations & Technical Assistance

Chattogram, Bangladesh • sharif.azmaine67@gmail.com • +880 1701064355 • LinkedIn Profile

PROFESSIONAL SUMMARY

Detail-oriented Admin Executive with hands-on experience in administrative operations, cross-functional coordination, and day-to-day technical assistance for colleagues across office locations. Alongside core administrative responsibilities, provide practical support with password resets, company portal account creation, basic access issues, remote desktop application setup, software-related queries, and basic Windows issues. A long-standing technology enthusiast with a strong passion for technology, troubleshooting, and learning new systems. Naturally persistent when solving technical problems, with a practical approach to investigating issues, trying solutions, and escalating matters that require specialized IT support. Strong written and verbal communication skills, with a customer-focused approach to helping users stay productive.

PROFESSIONAL EXPERIENCE

Admin Executive | Savino Del Bene Chattogram, Bangladesh

October 2025 – Present

- Manage daily administrative operations and coordinate with colleagues across departments to ensure smooth and efficient business operations.
- Provide day-to-day technical assistance to colleagues in both **Chattogram and Dhaka offices** alongside regular administrative responsibilities.
- Assist users with **password resets, company portal account creation, and basic account/access-related issues**.
- Install and configure the company's **remote desktop application** to help colleagues connect to the required work environment.
- Assist colleagues with **software-related queries and basic application issues**, providing practical guidance where possible.
- Provide basic assistance with **Windows-related issues**, troubleshooting common problems and guiding users through available solutions.
- Investigate routine technical issues independently and **escalate issues requiring specialized IT support** to the appropriate team.
- Maintain and manage operational data through the **L-Shipping system**, including shipment tracking, database updates, and management reporting.
- Coordinate with cross-functional teams and provide timely responses to operational queries and requests.
